

Risk Warning for Supreme FX

Last updated: November 13, 2024

Risk Warning

CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

High Risk Warning

Foreign exchange trading carries a high level of risk that may not be suitable for all investors. Leverage creates additional risk and loss exposure. Before you decide to trade foreign exchange, carefully consider your investment objectives, experience level, and risk tolerance. You could lose some or all of your initial investment; do not invest money that you cannot afford to lose. Educate yourself on the risks associated with foreign exchange trading and seek advice from an independent financial or tax advisor if you have any questions.

Currency Fluctuations

If you enter into any transaction based on currency:
(a) any profit or loss arising from fluctuations in the exchange rate affecting such currency will be entirely for your account and risk.
