

TRADING STYLE POLICY'S

Scalping in forex/CFD trading is a trading style that traders utilize to benefit from minor price changes during a short period. In **Supreme FX** client agreements, the definition of Scalp trading transactions is when traders enter and exit positions in less than 120 seconds on Foreign Exchange and spot Metals, and within 300 seconds on **CFD** Contracts (including single name **stocks, equity indices, future metals, crypto CFDs**). **Forex/CFD** "Scalping" strategies are not permitted on our platform for traders.

Introducing Brokers will NOT receive any fees for transactions that are defined as Scalping transactions for Forex/CFD trades.

STALE TRADING

To ensure the stability and accuracy of the **Supreme FX** platforms and products, we define Stale Pricing as an old price which does not reflect the most recent updated price figure for the product.

Supreme FX considers any trade executed on these prices as voided and does not reflect the real market price, therefore **Supreme FX** reserves the right to cancel them immediately.

MISQUOTES

We have an agency execution model and automatically cover all client positions with executing brokers and liquidity providers. Although we mitigate the risk of invalid price feeds reaching clients through utilizing a price aggregation system which generates a price from multiple liquidity providers (typically in excess of 10 liquidity providers). There are rare occasions where the price can become "skewed". In such rare instances, if orders are filled at that price, we reserve the right to reverse orders where misquote occurred.

We will investigate these cases and notify the client via e-mail or telephone that trades are canceled. We will always check to ensure that the reversal does not generate an unintended position. If the order is executed and subsequently reversed to open a position, any subsequent order(s) closing this position would also be reversed leaving the net P&L at zero, this way the client will not be disadvantaged by this reversal due to our invalid price delivery.

STALE QUOTES AND MISQUOTES POLICY

- **Supreme FX** quoted prices on rare occasions may become “stale” or “skewed”.
- **Supreme FX** reserves the right to cancel orders executed at idle or skewed prices.
- **Supreme FX** will actively monitor/report and investigate such trading activity and if those trades were canceled will notify the client accordingly.
- **Supreme FX** will pursue the fair treatment of its customers and will use its best endeavors to make sure cancellations are performed fairly and that the client is not disadvantaged by the cancellation.
- That is, there are no inadvertent positions left open and the client's Net Position is in line with the client's positions at the time of correction.
